Web Application Development with JavaScript

fetch in Node.js

Department of Computer Science
University of MD, College Park

Slides material developed by Ilchul Yoon, Nelson Padua-Perez

Revisiting fetch (Node.js)

- You can use fetch in Node.js (you don't need to install any modules)
- In the past, we rely on **node-fetch**
- **Example:** getJSONProblem.js (Problem: we cannot see the results back in main())
 - Using node-fetch to show old alternative
- **Example:** fetch1.js, fetch2.js
